

# Addieren, subtrahieren mit ganzen Zahlen

Schulübungsblatt - Lösungen

$$(+10) + (-5) = \underline{10 - 5} = \underline{5}$$

$$(-6) + (-8) = \underline{-6 - 8} = \underline{-14}$$

$$(-7) + (-8) = \underline{-7 - 8} = \underline{-15}$$

$$(+3) + (+5) = \underline{3 + 5} = \underline{8}$$

$$(+14) + (-18) = \underline{14 - 18} = \underline{-4}$$

$$(+15) + (-20) = \underline{15 - 20} = \underline{-5}$$

$$(+11) - (-7) = \underline{11 + 7} = \underline{18}$$

$$(-3) - (+16) = \underline{-3 - 16} = \underline{-19}$$

$$(-2) - (+3) - (+2) = \underline{-2 - 3 - 2} = \underline{-7}$$

$$(-2) + (+7) + (+5) = \underline{-2 + 7 + 5} = \underline{10}$$

$$(+4) + (-7) + (+4) = \underline{4 - 7 + 4} = \underline{1}$$

$$(-7) - (+16) + (-8) = \underline{-7 - 16 - 8} = \underline{-31}$$

$$(-14) + (-9) - (-2) = \underline{-14 - 9 + 2} = \underline{-21}$$

$$(+7) - (+6) - (+11) = \underline{7 - 6 - 11} = \underline{-10}$$

$$(+8) - (+1) - (+15) = \underline{8 - 1 - 15} = \underline{-8}$$
